

## DOMANDA 1

Quali sono i Disturbi di Personalità del gruppo C secondo il DSM-5?

One of the most important concepts developed by D. W. Winnicott is his idea of the false self. Barbara Socor (1997) goes so far as to state that Winnicott's major contribution to psychoanalytic theory was his investigation of "the circumstances under which the self's emergence is most likely to be facilitated, and the quality of experience which is apt to foster true or false self systems"

Two handwritten signatures in black ink. The first signature is a stylized, cursive 'E'. The second signature is more complex, appearing to be 'M. A.' with a flourish at the end.

## DOMANDA 2

Nella SVaMDI quali aree di funzionamento vengono rilevate?

His continual use of words such as "aliveness" and "spontaneity" points to his concern that vitality can be undermined, especially by the pressure to comply with the demands of others, which then become internalized. Since this can become a pervasive issue in one's life, it can give rise to significant frustration and anger as well as futility and despair. It occurs as people in the outside world make demands on one that are woven into one's fantasies and can cause significant conflict when the demands run counter to one's own feelings and thoughts, some of which are unconscious

### DOMANDA 3

Che cosa riguarda l'art. 330 del codice civile?

Winnicott became increasingly concerned with this issue in his work as a psychoanalyst, so much so that André Green (2005) considered Winnicott's life a major source for his interest in this idea. According to Green, "throughout his life Winnicott struggled against compliance, conformism, and submission" (p. 7), all central to the nature of the false self.

## DOMANDA 4

Il candidato descriva il baby blues?

According to Winnicott (1960), “Compliance” by “the infant is the earliest stage of the False Self, and belongs to the mother’s inability to sense her infant’s needs” (p. 145). This process becomes a template for later development if the individual tries too much to acclimate to the desires, if not the demands, of other people.

Handwritten signature in black ink, consisting of a large initial 'F' and a cursive name.

## DOMANDA 5

Che cosa prevede la normativa sui BES (Direttiva Ministeriale del 27 dicembre 2012)?

With regard to the issue of the false self specifically, Lore Schacht (1988) has written an important article, but it contains little in the way of biographical information. In saying this, I am not criticizing those who focus primarily on biographical issues or theoretical matters. I am suggesting only that more work might be done with regard to understanding the relationship between his life and work, for each of these domains provides information that helps clarify the other.

## DOMANDA 6

Nella certificazione scolastica ai sensi della L.104/92, quale articolo determina la gravità da segnalare ai fini di un più efficace progetto di inclusione?

In the subsequent history of psychoanalysis, the autobiographical element is evident in the work of many other figures. According to Charles Strozier (2002), Heinz Kohut heavily relied on his own life as evidence for the importance of self psychology and the limitations of classical psychoanalytic theory, as seen in Kohut's "The Two Analyses of Mr. Z." Kay Souter (2009) has shown how Wilfred Bion's experience in World War I had a significant impact on some of his major ideas, such as "nameless dread" and "containment."
