- **CASTELFRANCO VENETO HOSPITAL**
Via dei Carpani, 16/Z, Single Unit,
Floor 9
0423 732640

THE "BECOMING A MOTHER" PROJECT

THE FAMILY ADVICE CENTRE WAS ESTABLISHED AS GUIDE FOR PREGNANCY

The Veneto Region, similar to what happens in other Italian regions, has activated a **care programme for low-risk pregnancy** in line with the most advanced guidelines of the World Health Organization, which defines pregnancy as a physiological process (Veneto Region Council Resolution No. 568/2016).

As part of this pathway, the obstetrician:

- **promotes, protects and supports** the naturalness of the birth event from pregnancy to the postnatal period;
- **monitors the development of gestation**, including by prescribing the examinations required by the national protocol;
- **guarantees customised support** to women;
- **promotes the obstetrical continuity of care** across the facilities of the hospital where it is provided.

WHO IS IT FOR? (A chi è rivolto)

All **pregnant women residing in the territory of ULSS 2**. The obstetrician and gynaecologist follow the woman from the beginning of pregnancy until after delivery by providing information and ensuring access to available treatments and services most appropriate to each woman's personal needs.

HOW TO ACCESS (Come accedere)

The service is free of charge and can be accessed directly **without a referral from a primary care physician or gynaecologist**. The interested party may appear in person or call the relevant Family Advice Centre office.
